DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakanishi et al (Fig. 1).

Nakanishi et al (Fig. 1) discloses an amplifier circuit comprising variable power source voltage generating means (64) which generates the power source voltage (VA2) which is variable, and driving voltage variation means (62) which varies a driving voltage (VA1) by which the driving circuit (the circuitry in the 62) drives the switching elements (transistors in the 32). It should be noted that no patentable weight is given to the preamble of the claims.

Allowable Subject Matter

Claims 2 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2817

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Patent numbers (5,990,751; 6,683,496) are the amplifiers with the variable voltage sources.
